Education

Higher Institute of Applied Science and Technology of Sousse, SWE Degree — Sept 2019 – Jul 2024
- **Coursework:** Computer Architecture, Software development, Conception, Algorithms & optimization

Experience

Software Developer, Mass Analytics – Lac 2, Tunis — Aug 2024 – Present
- Improved the desktop application UI by refactoring existing components, delivering new features, and enhancing overall design for a more intuitive user experience.
- Spearheaded the migration of the frontend from a desktop to a web-based SaaS application, optimizing user flows and implementing Angular best practices for a seamless and modern design.

Full-stack Web Developer intern, Telnet – Urban Center, Tunis — Feb 2024 – Jul 2024
- Developed a user-friendly hybrid work management app with an optimized microservices architecture.
- Improved workflow automation and cross-department communication, enhancing efficiency and significantly reducing paperwork.

Part-Time Web Designer, Aleia – Tunis, Montreal — Jul 2023 – Jan 2024
- Developed SEO-centric websites with PHP, WordPress, JavaScript, and CSS, boosting organic traffic by 40% across 7 successful projects.
- Implemented Figma designs with React.Js, boosting conversion rates, enhancing user experience and ensuring high client satisfaction.

Part-Time Web Development Instructor, Gomycode – Tunis, Sousse — Sept 2022 – June 2023
- Mentored more than 100 aspiring web developers in HTML, CSS, JavaScript, and Git, fostering hands-on learning and project success.
- Introduced advanced MERN stack concepts, empowering students to experiment, build projects, and excel in web development with high satisfaction rates.

Salesforce Developer intern, Talan – Tunis, Tunisia — June 2022 – Aug 2022
- Built and optimized Lightning Web Components and Java solutions for an insurance CRM, streamlining client management processes, and delivering a tailored user experience to meet client needs.

Projects

Marketing Analytics Desktop Application (MMM)
- Developed a desktop application for marketing analytics, enabling data-driven decision-making with interactive visualizations, performance tracking, and marketing mix modeling. The app provides insights into marketing effectiveness, helping users analyze trends, measure impact, and optimize strategies.
  - Technologies implemented: JavaFX, Java, JUnit, JFreeChart, FXML, CSS

Hybrid Work Management System
- Development of a Spring Boot and Angular-based microservices web application to optimize workspace utilization, streamline remote and on-site collaboration, and manage hybrid workspaces with features like booking, scheduling, and real-time availability tracking.
  - Technologies implemented: Angular, Spring Boot, Oracle SQL, Keycloak, Eureka, API Gateway.

Technologies

Technical skills: Angular, JavaFX, SpringBoot, FastAPI, NodeJs, ExpressJs, MongoDB, SQL, PostgreSQL, Git, JUnit

Others: Problem solving, System design & Conception, Jira, Web Design, Bitbucket, GitHub
